THE NEW CORPUS SERIES

PERMOBIL HAS RELEASED THEIR NEW CORPUS SERIES MOBILE CHAIRS AND IN TURN STEALTH PRODUCTS HAS DEVELOPED A WIDE RANGE OF MOUNTING OPTIONS FOR OUR MANY ACCESSORIES TO GIVE A CLEAN SLEEK LOOK.

HEADREST HARDWARE

The Corpus 3G back has a 7" horizontal track for the seat back mount. This gives an adjustment of about 5" for left and right movement when positioning the headrest hardware. The track can also be moved vertically on a pre-drilled hole step pattern.

Ultra Series

ULTRA SERIES HEAD POSITIONING SYSTEM

The Stealth Ultra (SU) headrest has the widest range of adjustments for support and positioning. Swing away pads and switches can be added to give a wide range of support and functions.

COMFORT PLUS SERIES HEADREST

For standard head support we offer our Comfort Plus (CP) series. This headrest can be equipped with embedded egg or proximity switches for a sleek look.

Comfort Plus Series

TRI-COMFORT PLUS SERIES HEADREST

Take the standard out of the standard with the latest Stealth's headrest, the Tri-Comfort Plus series. Almost like the Combo Series, the Tri-Comfort extends with ergonomic lateral support that promote additional stability and resting points. With many options to choose from the TCP series is versatile and easy on the eyes.

COMBO SERIES HEADREST

The Combo (CB) series is a winged style headrest that cradles the head without having additional head supports. It consists of a posterior pad and two lateral pads.

Tri-Comfort + Series

ALL POSITIONING SERIES HEADREST

For positioning and support, the All Positioning (AP) is a simple but sleek headrest. Made of a very unique malleable metal, the AP can be adjusted on demand.

Combo Series

AP Series

LATERAL SUPPORT

The **Worlds Best Laterals Series (TWB)** contains the most versatile laterals on the market. The TWB series can be used for thoracic (**TWBL**) and pelvic support (**TWBADD**), and also comes in a miniaturized (**Niño Series**) pediatric version (**TWBNL**). The TWB series is comprised of link hardware, that allows for inset/offset adjustment and growth manipulation to accommodate any size client with ease. The swing-away feature is equipped on all TWB series laterals allowing for easy transfer. The addition of the Full Surface Contact (**FSC**) feature takes this lateral to a whole new level by offering support on a 360° axis. It allows for the pad to simulate therapist's hands by rotating to the curvatures of the body. If parts of the chair interfere with the swing away feature, then the **SWINK** option would give a second position for links to swing away.

THIN STYLE LATERALS

Stealth Products also offers a sleeker thin style lateral (**TWBTL**) without link or with link (**TWBSTL**) that have a slim line profile and reduced weight. The thoracic laterals mount with an after market track developed by Stealth Products for the CS3G seating, while the pelvic utilizes the tracks on the seat.

KNEE STOPS

The stops add comfort to the body and keep limbs positioned with ease. They swing away to assist in transfers as well and adapt to the tracks that Permobil implemented on their chair (**KN1ADD-TRK**) or in their existing mounts (**KN1ADD**).

ELBOW STOPS

These support/stops feature the swing away option and the rotating pads that will move in almost any direction. They can be mounted on tracks or on canes. Many options are available for the foam and cover materials.

PORTABLE DIGITAL MEDIA MOUNT

Stealth has developed several mounts for digital electronic peripherals. These include the iPad® (1&2), Motorola® xZoom™, laptops, and universal cell phone mounts. The ARM250P is the adapter for these peripheral mounts that we have created to mount under armrests of the new Permobil chairs that are equipped with track mounting.

GATLIN MID-LINE MOUNTS

The Gatlin series is a mid-line positioning system for trays, switches, displays, and driver controls. The GAT400P has 8 locking positions and GAT405P is a swing away style that rotates on a 95° or 180° horizontal rotation. These part numbers will mount in the arm mounts provided by Permobil.
