PRODUCT DESCRIPTION

The i2i has been one of Stealth's signature products and one that is recognized around the world. The i2i head, neck and shoulder positioning system is offered in eleven different series. We have made significant improvements through the years and now have added a few more. It's important to remember that the Headrest is the finishing point of any seating system—not a starting point. If a client does not hold his/her head erect it does not necessarily mean he has poor head control. *It could be the result of a poorly fitting or improper seating system!*

TECHNICAL DATA

1. 5/32 tool for socket-head and flat-head screws on mounting ring and mounting hardware.
2. Includes: ball mounting ring and headrest pad.
3. Headrest attaches to the TWB480-FDM.

SELLING POINTS

1. The i2i is designed to help those with difficulty of movement and keeping the head upright.
2. Keeping the head straight and level improves eye contact to promote socialization and assist in interpreting responses and communication.
3. Keeping the user's head straight eases feeding, reduces saliva drool and greatly reduces the need to reposition the user's head, neck, and shoulders.

BUILD YOUR i2i SERIES HEADREST

STEP 1: NECK SIZE

The individual's neck circumference will determine the appropriate size i2i.

NECK SIZES

480	Under 11"
580	11"-14"
680	14"-16"
780	16"-18"

STEP 2: ARM LENGTH

To determine arm length, measure from the top of the clavicle to the bottom of the sternum.

ARM LENGTHS

i2i Standard

480	6.5"
580	7.5"
680	8"
780	9"

i2i Short Arm

481	4.5"
581	5.5"
681	6"
781	6.25"

STEP 3: EAR CUTOUTS (i2i-EC)

Individuals with lateral flexion will need ear cutouts and gel inserts to help reduce friction and pressure points.

STEP 4: FABRICS

Select a material for both the i2i and the Chin Prompt.

FOAM/GEL

Closed Cell Foam
Action Gel

COVERS

Dartex (standard)
Reverse Dartex
Vinyl
Sheep Skin
Neoprene

STEP 5: LINKS (TWB-LINK)

Standard i2i Hardware has a maximum reach of 6". Additional links increase the maximum reach.

STEP 6: SWING-AWAYS (SUS9 SERIES)

Facial lateral Swing-Aways can be added to the i2i for pad, switch, speaker sites and chin control devices.

HARDWARE OPTIONS

TWB480-17FDM

An easy transfer flip down mount and links make Stealth's TWB480-FDM.

TD100

The Tone Deflector is design to absorb quick impact and aver slanted angle loading.
