

ALTERNATIVE DRIVE CONTROLS

“Empowering
POSSIBILITIES”

I-Position • I-Set • I-Drive

The I-drive is equipped with an on-board CPU, eliminating the need for a secondary controller box.

This CPU introduces a new level of performance in head array technology. Superior processing speed provides the end-user with a much more responsive interface with their mobility option. This increased response time equates to smoother acceleration, more controlled veering, and an overall improvement in driving confidence.
