Safety Warnings

Comfort Plus Headrest

The Comfort Plus Headrest should only be prescribed and fitted by qualified health care professionals.

DURING TRANSPORT, ensure that the client is properly aligned and that seat belts and harness are fastened. Be sure that the headrest is also aligned so that the user does not move into a position that creates force against any part of the body. The Comfort Plus headrest is not intended to be used as a stabilizer during transport.

FAILURE TO COMPLY WITH THESE WARNINGS COULD RESULT IN SERIOUS BODILY HARM

Care And Maintenance

- Periodically check the hardware for loose screws or worn parts. Replace or repair the parts as needed.
- Periodically check the headrest for any foam breakdown and/or metal coming through the foam as this could be potentially dangerous for the client.
- To wash the headrest cover: Remove the cover from the headrest, machine wash in cold water on delicate cycle and drip dry.

Installing the Seat Back Mount

Each seat back mount will come with two ¼ - 20 x ¾" Socket Head Screws and four 10 – 32 x ¾" Socket Head Screws for mounting to the seat back. To attach to the seat back: Drill the necessary holes in the seat back. Insert the ¼ - 20 and/or the 10 – 32 Socket Head Screws through the designated holes in the seat back mount [A], through the seat back, then fasten with nuts on opposite side.

Mounting Headrest to Hardware

(Multi-Axis or Link Hardware)

Place the 1” Ball into the designated socket in the rear of headrest. Place the split ring around the 1” ball & insert the three socket head screws [B] through the ring and into the threaded holes in the rear of headrest. Tighten screws with a 5/32 hex key.

To use the flip down function:

**Link Hardware/Offset Link Hardware:**

Press the red release button [E], the hardware will flip down. The hardware will automatically lock into place when returning to the upright position.

**Multi Axis Hardware**

There are three points of adjustment on the multi axis hardware. For angle, fore/aft, or rotational adjustment, lightly loosen the socket head screws and flat head screw in the triangle [C], set desired position and retighten screws.

**Link Hardware**

There are three points of angle adjustment on the link hardware. To adjust angles [D], lightly loosen the flat head screws, set desired angles and retighten screws.

**Standard Straight Hardware**

The standard straight hardware offers fore/aft adjustment. For fore/aft adjustment: Lightly loosen the socket head screws [G], set desired position and retighten screws.

*All headrests, aside from their standard adjustability, also offer height adjustment via the seat back mount.*
